SUMMARY

AI & Data Science student with strong foundations in Python, Java, and full-stack development. Experienced in building and deploying real-world AI applications using Node.js, Flask, and Linux-based systems. Passionate about problem-solving, scalable systems, and end-to-end software development.

EXPERIENCE

ShenAi Private Solutions, *Project Intern*

08/2024 – 10/2024 | Erode, Tamil Nadu

- Contributed to a real-time Speech-to-Text system using deep learning techniques.
- Assisted in model integration and preprocessing of audio data.
- Worked with Python-based pipelines to improve transcription efficiency.

SAN Technovation Pvt Ltd, *Data Analyst Intern*

07/2025 | Perundurai, Erode - 638052

- Cleaned and analyzed datasets using Python and SQL.
- Built dashboards for data visualization and reporting.
- Generated insights to support business decisions.

EDUCATION

B.Tech Artificial Intelligence and Data Science, *Nandha Engineering College, Erode*

09/2023 – 04/2027

- 8.4 CGPA

HSC Second Year Education, *Lions Matric Higher Secondary School*

06/2021 – 04/2022

- 86%

SKILLS

Programming & Scripting

Java, Python, JavaScript

AI/ML Frameworks

TensorFlow, Keras, PyTorch, scikit-learn, OpenCV

Backend tools & APIs

Flask, FastAPI, Node.js, REST APIs, Postman

Deployment & Integrations

Streamlit, Vercel, Render.

Linux & DevOps

- Linux Administration (Ubuntu), Bash Scripting
- Process Management, File System & Permissions
- Docker, Git, Python Virtual Environments

Frontend Libraries & Framework

React.js, Bootstrap, Tailwind, HTML, CSS

Databases

MySQL, MongoDB

PROJECTS

Speech-to-Text Web Application, *Flask, WebSpeech API*

- Built a speech-to-text web application using Flask and WebSpeech API.
- Optimized backend response time for real-time speech processing.

Plate Vision: AI-Driven License Plate Recognition (ALPR), *YOLOv5, Flask*

- Developed an AI-based license plate recognition system using YOLOv5 and OpenCV.
- Deployed model in GPU-enabled Linux environment for faster inference.
- Integrated with Flask API for real-time vehicle detection.

AI-Powered IoT Solution for M-Sand Quality Monitoring System, *AI/ML, React, SQLite, IoT, Flask*

- Built an AI-powered IoT system for M-Sand quality analysis using image processing.
- Integrated React frontend with Flask backend and SQLite database.
- Enabled real-time classification of sand quality using ML models.

Urudhunai - Hyperlocal Community Resource Network [🔗](#), *(live)*

- Built a full-stack web platform connecting users with nearby essential resources through a responsive React-based interface and secure REST APIs.
- Developed role-based authentication, resource management, and real-time request workflows using Node.js, Express.js, and MongoDB.
- Deployed the application on Vercel and Render with integrated cloud database support, enabling scalable access and seamless cross-platform usability.

CERTIFICATIONS & ACHEIVEMENTS

Data Analysis with Power BI

Workshop by Mr. Sapthagiri (Feb 2025) conducted at Nandha Engineering College.

Python101 for Data Science [🔗](#)

cognitiveclass.ai

Introduction to Generative AI [🔗](#)

Google

GenAI Mastery Workshop [🔗](#)

Nxtwave

Solved 150+ problems on LeetCode (Data Structures & Algorithms)
